Investment Objective

The principal investment objective of the Fund is to seek long-term capital appreciation of its assets by investing in a portfolio of the equity securities of Vietnamese companies or Overseas-listed companies. In practice, however, the Fund invests only in Vietnam-listed companies except where it is able to obtain exposure via other offshore collective investment schemes, which may not in aggregate exceed 10% of the Fund's Net Asset Value.

Investment Restrictions

At the time of investment, no more than 20% of the NAV may be invested in the shares of a single issuer; and no more than 10% of the NAV may be invested in pre-listing companies. Investee companies must have a net asset value or capitalisation in excess of US\$ 20 million, or would fulfil this condition if valued at the most recent market average P/E ratio.
