Investment Process (1)

Process

- Idea generation across the investment team; daily research meetings provide a forum for origination and ongoing debate
- We conduct extensive industry and company research and seek to build long term relationships with both potential and existing portfolio companies
- Active engagement with over 140 companies, covering over 90% of the market capitalisation of the Ho Chi Minh and Hanoi stock exchanges combined
- High conviction holdings with low turnover

Corporate Governance

 Corporate governance standards vary widely in the Vietnamese market (as everywhere), so to the extent that we discover companies which we believe are likely to behave in a manner detrimental to the interests of minority shareholders, we mitigate these risks through our investment process

Investment Process (2)

Operational Risk Management

Governance

Regulatory Authorities and Affiliations

- PXP Vietnam Asset Management is licensed & regulated by the BVI Financial Services Commission (FSC) and is a member of the Alternative Investment Management Association (AIMA)
- Our Representative Office in Ho Chi Minh City is licensed & regulated by the State Securities Commission (SSC) of Vietnam
- PXP Vietnam Emerging Equity Fund & PXP Vietnam Smaller Companies Fund are regulated by the Cayman Islands Monetary Authority (CIMA)

Transparency

- Publication of daily NAV estimates on our website
- Our website (<u>www.pxpvietnam.com</u>) offers unrestricted access to qualified investors and contains all historic regular & periodic documents, including *inter alia* monthly newsletters, annual & interim reports and offering documents

Why we don't have a UCITS Structure

- We are genuine high conviction investors & do not want to be constrained by the 5/10/40 rule
- We are not seeking to run money for retail investors (arguably the primary rationale for UCITS funds) as we foresee the interests of institutional/long-term holders being negatively impacted by swings in retail investor sentiment
- Our view is that the VN Index will double from here in 3 to 5 years and given the requirement for a 3-year track record in the specific vehicle on behalf of many investors we feel that a launch now will be at risk of being a product destined to raise money at or close to the top of the market (*cf.* our focus on performance over asset gathering, above)
